President's Message

Ken Hamer

The Howl of the Hellcat, The Wail of the Banshee

One of the initial reasons I've heard people say why they don't care for electric vehicles (EVs) is, "They have no soul, no personality, no sound." Well, maybe Dodge is changing part of that.

On August 17, Dodge introduced the world to its first battery electric vehicle and the next generation of the legendary Charger nameplate. The Dodge Charger Daytona SRT Concept BEV "roared" to life and made it clear that if the brand that brought us the Hellcat cars had to make an EV, they are going to do everything possible to make it more interesting than any other EV on the market. And this Charger debuted as a two-door design.

Although they didn't release any power or performance numbers, or pricing, Dodge stated that this Charger EV - which debuted in the top-of-the-line Banshee trim - will beat the current Hellcat cars in every performance category. The Hellcat Challenger is marketed as being able to run an 11.20-second quarter mile and hit 199 miles per hour. So are we to expect this concept car to be capable of 10s at the dragstrip and 200 miles per hour? That's pretty heady territory.

The plan is for this Charger EV to be offered with two powertrain configurations - a 400 volt system and an 800 volt system. There will be three trim levels available at dealerships, all of which come standard with all-wheel drive, and Direct Connection will offer two performance upgrade packages for each of the three trim lines. Those power upgrades will be added via software and hardware changes by Direct Connection/Power Broker dealerships.

The Banshee also features the new Dodge PowerShot feature which allows up to 15 seconds of peak power output. This system is controlled by a button on the steering wheel and, provided the battery is charged properly, the driver can use this feature over and over with short rest periods between uses.

Maybe the most unique feature of the Dodge electric powertrain, and makes it so unique from other EVs, is the exhaust system. An EV with an exhaust? The Fratzonic Chambered Exhaust system creates a unique tone, and while it acts like a gasoline engine's exhaust in terms of idling and revving, it isn't a speaker under the car that plays Hemi sounds. Dodge created a truly unique sound that is unlike anything ever heard. The "wail of the Banshee" reaches 126 decibels, just as loud as the Hellcat cars, but with its own, specific sound. The Dodge EV literally screams at everyone it passes and offers the same "screw you" attitude as the gas-powered cars of today.

Inland Mopars continues to ask for volunteers for our Vice President club officer position, and a continuing need for volunteers to assist with our social media presence (Facebook, Instagram). We need a social media presence to reach out to potential new younger members.

Reminder:

- Our September club meeting is scheduled for Sunday, September 4. The club meeting will be held at our usual location, the banquet room at Cactus Cantina restaurant in Riverside. 9am for breakfast with the meeting starting as close to 10am as possible.

As always, thank you to everyone for all you do to make Inland Mopars Car Club the very best it can be - the club's reputation - and both our annual car show and toy drive - is a direct reflection of the membership //

Honorary member Mike Kelly went to a little show in or near his hometown in Maryland sponsored by the local fire department and sent a few Mopar photos.

Lyon Air Museum photos by Lonnie Clabaugh & Editor

Sunday August 28th was the club event voted on by the club at the Lyon Air Museum on the backside of the John Wayne Airport in Orange County. Ken Hamer, Lonnie & Robin Clabaugh, Gene & Susan Endo, Bill Heckman & I made the trip to see a special display going on thru September 5th, Labor Day; *War Surplus on Wheels, WWII's Influence on Hot Rodding*. A nice collection of planes, vehicles and belly tank racers. Well worth the visit. Add another hour if you check out all the side wall displays. Sampling of the display is shown here.

After a couple of hours wandering thru the planes and vehicles, we all headed over to Duke's Café in Placentia for lunch. Duke's has hosted a toy donation box for us the last two years.

Fort Irwin Toy Drive 2022

The toy drive for Fort Irwin is starting to look for toy donation drop off box locations. We have some already committed after the 2021 toy drive. If you know of a business that you think might like to have a donation box on their premises, please let me know. We have dates booked for the Ramona Tire Get Together and the Mopars and Friends at MoTech Performance events. See the March 2022 Scat Pack Newsletter for a listing of known clubs that participated in the 2021 toy drive.

As you can see from the schedule below, the toy drive consumes months of planning and coordination between clubs, businesses, toy donation box locations, as well as Fort Irwin. Planning has started for 2022.

<p>2022 Toy Drive Event Schedule:</p>	<p>May 15 - Mopars in May, Inland Mopars, Ontario (happened)</p> <p>August 20 - Heroes & Hot Rods, Anaheim (rescheduled to November 20)</p> <p>October 15 - Champion Cooling Systems, Lake Elsinore</p> <p>October 15 - Legends Burgers, Rancho Cucamonga</p> <p>November 12 - Ramona Tire, Rancho Cucamonga</p> <p>November 19 - Mopars at MoTech Performance, Murrieta</p> <p>November 20 - Riverside Cars & Coffee at J&M Speed Center</p> <p>November 20 - Heroes & Hot Rods, Anaheim</p> <p>December 3 - The Zimmerman Automobile Driving Museum, El Segundo</p> <p>December 9 - Set up for the Toy Drive & Pot Luck at the Longs</p> <p>December 10 - Toy Drive & Pot Luck at the Longs</p> <p>December tbd - Toy Delivery to Fort Irwin</p> <p>December tbd - Highway 39 Event Center Car Show & Toy Drive, Anaheim</p> <p>December 17 - Inglis Classics Holiday Car Show & Toy Drive, TBD</p> <p>December tbd - If necessary, second Toy Delivery to Fort Irwin</p> <p>January tbd - Christmas in January toy distribution at Fort Irwin</p>

Sherm Taylor Scholarship Endowment

Some of you will remember Sherm Taylor as the big guy at the Chaffey College Car Show. He was an automotive instructor and ended up wearing many different hats at Chaffey. Last year he was diagnosed with pancreatic cancer and had started treatment. He passed away in March. Sherm had a 440 engine he was selling before his passing. It is still listed in the Nuts & Bolts section of this newsletter. His sister decided to leave it to Chaffey College after his passing so Chaffey will be using the funds raised towards the scholarship endowment under his name. If you haven't heard about the endowment in his name yet, you can make a donation either on-line or checks can be made out to the Chaffey College Foundation & mailed to the address below:

On-line at <https://chaffey.kindful.com/?campaign=1118679>

Snail mail to Chaffey College Foundation
5885 Haven Ave,
Rancho Cucamonga, CA 91737

Please note Sherm Taylor scholarship in the memo section.

---	---

Why buy Taiwan made reproductions when you can get the highest quality remanufactured door hinges, using only original, Mopar made hinge cores.

I Remanufacture a complete line of Mopar application only door hinges using only new, high quality US made components. No import parts ever.

Over 25 years experience remanufacturing Mopar only door hinges.

I remanufacture the following hinge applications: 1967-1976 A-body, 1962-1965 B-body, 1967-1970 B-body, 1971-1978 B-body, 1970-1974 E-body. I can refurbish your old hinges with quick turn-over time.

Cores are occasionally available for an additional cost. Check with us first.

Refurbish process:

- * Disassemble and inspect for damage or excessive wear or rust pitting. Must meet my quality standards (undamaged, unaltered, rebuildable). If they pass inspection: then I remove door check pins (these are pressed in and must be cut out). Remove pins and bushings in upper hinges.
- * Square up hinge bodies. Bore & ream to fit oversized pivot pins in lower hinges. NO BUSHINGS.
- * Install new roller pins by MIG welding with new wave springs and refurbished rollers.
- * Tighten upper hinges.
- * Prime hinges with Automotive grade primer. Compatible with enamel or lacquer.
- * Install new Oil-lite bronze bushings and new pins in upper hinges.
- * Lube all pins and other moving parts with a Teflon lube.
- * Install pins and "S" lower pivot springs.
- * Chase all threads with proper sized thread chaser die.
- * Mark hinge install location on hinge bottoms.
- * Package in moisture proof, sealed heavy thickness transparent packaging.
- * Box up, enclose packing slip, install and adjust instructions from service manual.
- * Ship out by US Priority Mail.

Mention you are a member of Inland Mopars Car, FABO, FBBO, FEBO or E-Bodies.org and receive a member discount off of 2022 retail prices (effective January 1, 2022):
